Supplies and Consumables for **KODAK** and Alaris Scanners

Kodak Alaris offers supplies and consumables for all KODAK and Alaris Scanners. For optimal feeder performance and image quality, Kodak Alaris recommends using professional cleaning materials and consumable items, such as:

- Roller cleaning pads
- Transport cleaning sheets
- Staticide wipes
- Calibration targets
- Feeder and Separation rollers
- Lamps
- Ink cartridges
- Imaging guides

Usage figures of supplies and consumables are not guaranteed. Customer operating environments, document type, the condition of the documents being scanned, and not following the recommended cleaning and replacement procedures can cause the life of the consumables to vary.

This document contains catalog numbers and descriptions for supplies and consumables used with KODAK and Alaris Scanners. The guidelines specified in this document are based on testing by Kodak Alaris.

- **Calibration Target:** a calibration target will last longer if the recommended maintenance of the scanner is followed. Variables such as paper types (e.g. carbonless paper), dirty feed rollers, which can transfer debris on the target, etc. will shorten the usage of the calibration target. Always clean your scanner before calibrating.
- **Imaging Guides:** imaging guides may need to be replaced if you notice degrading image quality or if something happens to the white patch on the imaging guide.
 - Degrading image quality: (e.g. a consistent streak in most/all images that does not disappear after cleaning the imaging guides). Visually inspect the imaging guides to see if they are heavily scratched. If so, the imaging guides may need to be replaced.
 - White patch: White patches are not on all imaging guides. The i800, i1800, i700, i600, i1400, i200, i100, 4500, 3590C Scanners and 5000/7000 Series Scanners include a white patch. Visually inspect the white patch and look for signs of aging (discoloration of the patch). If the patch shows discoloration, replace the imaging guide or call Service.
- **Tires:** KODAK and Alaris Scanners use replaceable tires that can feed a wide range of document types, sizes and thicknesses. Tire life and performance will vary based on the customer's document set, frequency of cleaning the transport and tires, and following the recommended schedule for changing tires. You should change the tires if you notice an increase in multiple feeds or stoppages, or a decrease in feeder performance that is not resolved by following the cleaning procedures.

Quick Reference — Lamps

The following chart provides a quick reference of the imaging lamps provided by Kodak Alaris Inc. and the scanners these consumables are used with. It is suggested that all lamps be replaced every 500 hours of operation or as necessary (e.g. as reported by the scanner, repeated image calibration failures, etc.)

NOTE: Only the scanners listed below have customer-replaceable lamps. Contact Service for all other scanners.

Feed Module/Separation Roller Module Guidelines for the i800 Series Scanners Consumables Kits

The following table provides a guideline of how often to change the feed module, separation roller, pre-separation pad and tires. Extra tires are provided in the event one is damaged when replacing tires.

- **Feed module and separation roller tires:** tire life will vary depending upon paper types, environment and cleanliness. Nominal tire life is approximately 250,000 pages; results will vary. Degradation of feeder performance, multiple feeds, stoppages, etc. indicate a need to change tires. Change all tires on the feed module and separation roller at the same time.
- **Feed module and separation roller kit:** it is recommended that you install a new feed module and separation roller approximately every 7th tire change. Install a new feed module and separation roller at the same time.
- **Pre-separation Pad:** change each time you change the tires.

The following table provides a guideline of how often to change the feed module, separation roller, pre-separation pad and tires.

- **Feed module and separation roller tires:** tire life will vary depending upon paper types, environment and cleanliness. Nominal tire life is approximately 125,000 pages, results will vary. Degradation of feeder performance, multiple feeds, stoppages, etc. indicate a need to change tires. Change all tires on the feed module and separation roller at the same time.
- **Feed module and separation roller:** it is recommended that you install a new feed module and separation roller approximately every 4th tire change. Install a new feed module and separation roller at the same time.
- **Pre-separation Pad:** change each time you change the tires.

NOTE: The replacement tires are for use with the feed module and the separation roller.

Feed Module/Separation Roller Module Guidelines for the 3000 and 4000 Series Scanners Consumables Kits

The following table provides a guideline of how often to change the feed module, separation roller and tires. Extra tires are provided in the event one is damaged when replacing tires.

- **Feed Module and Separation Roller Tires:** tire life will vary depending upon paper types, environment and cleanliness. Nominal tire life is approximately 250,000 documents, results will vary. Degradation of feeder performance, multiple feeds, stoppages, etc. indicate a need to change tires. Change all tires on the feed module and separation roller at the same time.
- **Feed Module and Separation Roller:** it is recommended that you install a new feed module and separation roller approximately every 4th tire change. Install a new feed module and separation roller at the same time.

NOTE: Replacement tires are used on the feed module and separation roller.
